Silica Casting Mesh Filter Cups at a Competitive Price

Silica mesh in cup style shapes, specially designed for casting filtration

In metal filtration, filter cups provide several unique advantages that ceramic foam and cellular filters do not, as follows:

top of any standard pour cone

- ✓ No pre-heat required – unlike ceramic foam or cellular filters, silica mesh filter cups can be placed in the pouring cone just prior to the pour

- ✓ Best Results with Hot Topping – a filter cup can easily be removed after the pour so that there is no metal flow restriction during the exothermic action of the hot topping
- ✓ No custom pour cone required – foundries using ceramic foam or cellular filters typically have to use custom-made pour cones that have a small ledge added to the inner wall of the bottom for the filter to sit on
- ✓ Silica mesh filter cups can sit on the

Diameters available

- 100mm
- 110mm
- 120mm
- Other sizes available on request (after making tooling)

Filters are made on a special automatic machine – very cost effective
