

## Roofing Tissue

Roofing Tissue is an excellent substrate for water-proof roofing materials. High tensile strength, good corrosion resistance, and soaks easily with bitumen. Available with or without yarn reinforcements along its length. Its tear strength can be improved further by incorporating reinforcements into the tissue across its width.

Specifications						
Product No.	Density (g/m <sup>2</sup> )	Spacing of Yarns (mm)	Reinforcement Yarn Tex	Roll Length (m)	Binder Content (%)	Standard Width (mm)
RFT50	50	-	-	2500	< 25	1000
RFT60	60	-	-	2000		
RFT90	90	-	-	1500		
RFT50R	50	12	32 - 68	2500		
RFT60R	60	12	32 - 68	2000		
RFT90R	90	12	32 - 68	1500
